

Ethalone Solutions, Inc. is a company that builds and develops high-quality deployment software. Our goal is to bring a fresh stream into the world of installation. Our main product is Ghost Installer - powerful, easy to use, and yet an affordable solution for software developers. Ghost Installer has several levels of installation development as it offers various wizards for beginners as well as a set of sophisticated functions and variables for advanced programmers with full control of the installation process. Ghost Installer features a very small, fast, and reliable engine.
